Utilize the energy already at your disposal
Did you know that every gallon of used oil contains 140,000 BTUs of energy? A Hotsy multi-oil heater

taps into that energy by converting those BTUs into money-saving energy to heat your facility. A waste oil heater is an excellent secondary heating source.

With a Hotsy waste oil heater, you won't pay high disposal fees, nor do you need to worry about environmental liabilities for improper storage of used oil.

Triple Pass Solution - the WOH-50 model is ideal for larger facilities producing vast amounts of waste oil. Provides higher heating capacity with a smaller footprint.
